

NNIP Showcase, Part 3

Friday morning 11:30–12:00 a.m.

These 5-minute presentations give a lightning-quick overview of our NNIP Partners and their work.

Coding to Create 100+ Visualizations with the click of a button

Paulina Cano McCutcheon, CI:Now

This presentation will include a quick overview on how to integrate automation into ACS processing and visualization using SAS, R and ArcGIS for various parts of a large project. Ideas for working collaboratively with your team to identify findings and share insights using Google docs will be described. The audience will receive a template of R code that can be implemented to automate visualizations with their own data.

Renovating our online home: A user-centered approach to redesigning a local data website

Mariko Toyoji, Public Health - Seattle & King County

Here Communities Count takes you on the journey of their recent website redesign. With the help of students from the University of Washington's Human Centered Design and Engineering and Information Management Programs, Communities Count set out on a user centered approach to redesign and revitalize their website to help better meet local data needs.

Housing Affordability Analysis using Zillow ZTRAX

Mark Carnathan, Atlanta Regional Commission

The Atlanta Regional Commission's presentation will consist of a walkthrough how they used Zillow ZTRAX data to analyze housing price trends and define subareas to address housing affordability in The Atlanta metro region.

Why YOU Should Participate in the NNIP Network

Rob Pitingolo, Urban Institute

Partnership in NNIP comes with the expectation that organizations act as good stewards of the network. Participation takes many forms, including attending the partnership meetings, presenting at an online showcase, updating the NNIP website, and helping out fellow partner organizations. Rob will make the case about why it's valuable for all partners to participate in the network. He will tell a few success stories about partners working together and helping each other. Finally, he will review the NNIP Participation Report that we send to partner organizations each year.
