Data Chat

Neighborhood Health and Coronavirus
Amani

Made possible thanks to the support of the Robert Wood Johnson Foundation
Facilitated by Data You Can Use, Fall 2020
We are a local nonprofit that aims to connect people who need data with people who have data. We believe that there is no story without data and no data without a story.

**Introductions:** Please share your first name and how long you’ve lived here.
Talk about data and health in the neighborhood that may be related to risks of coronavirus

**Learn from YOU**
- Does the data seem right?
- Based on the what we’ve learned today
  - what could be done in the short term?
  - what could be done in the long term?
Looking at Local Data
Overview

**AMANI**

- **People**: 8,369
- **Housing Units**: 3,488
- **Older Housing Stock**: 64%
- **Service Industry Workers**: 42%
- **Households with No Vehicle**: 37%
AGE BREAKDOWN

- 19% Age 55+
- 35% Age 25-54
- 46% Children/Young Adults 0-24

A look at age
Your experience

★ THESE WORKSHEETS ARE FOR YOUR USE ONLY
★ List the first name of 10 people you know who live in the neighborhood
★ Circle an icon for each person you know who has the health condition
★ Put a question mark if you don’t know
High Blood Pressure

Diabetes

Chronic Asthma
How common are these conditions in Amani?

- **High Blood Pressure**: 5.0 out of 10 (50%)
- **Diabetes**: 2.2 out of 10 (22%)
- **Chronic Asthma**: 1.5 out of 10 (15%)
High blood pressure, diabetes, and asthma put residents of the Amani neighborhood at greater risk for COVID-19 than the City as a whole.
People are experiencing more anxiety and depression since the pandemic began.

Source: US Census Household Pulse Survey, September 2020. Data are collected at the state level and represent the national average.
Your advice and solutions

If you could make a recommendation to your neighbors about what might be done **in the next 6 months**, what would it be?

**After a vaccine has been developed and the emergency of the pandemic has passed**, what recommendations would you make to improve health conditions in the neighborhood?
THANK YOU!
