Data Chat

Neighborhood Health and Coronavirus Amani

Made possible thanks to the support of the Robert Wood Johnson Foundation Facilitated by Data You Can Use, Fall 2020

DATA YOU CAN USE

FROM PEOPLE YOU CAN TRUST

Who We Are

and how long you've lived here.

DATA YOU CAN USE

FROM PEOPLE YOU CAN TRUST

We are a local nonprofit that aims to connect

- people who need data with people who have
- data. We believe that there is no story
- without data and no data without a story.
- **Introductions:** Please share your first name

Today's Plan

coronavirus

t Learn from YOU

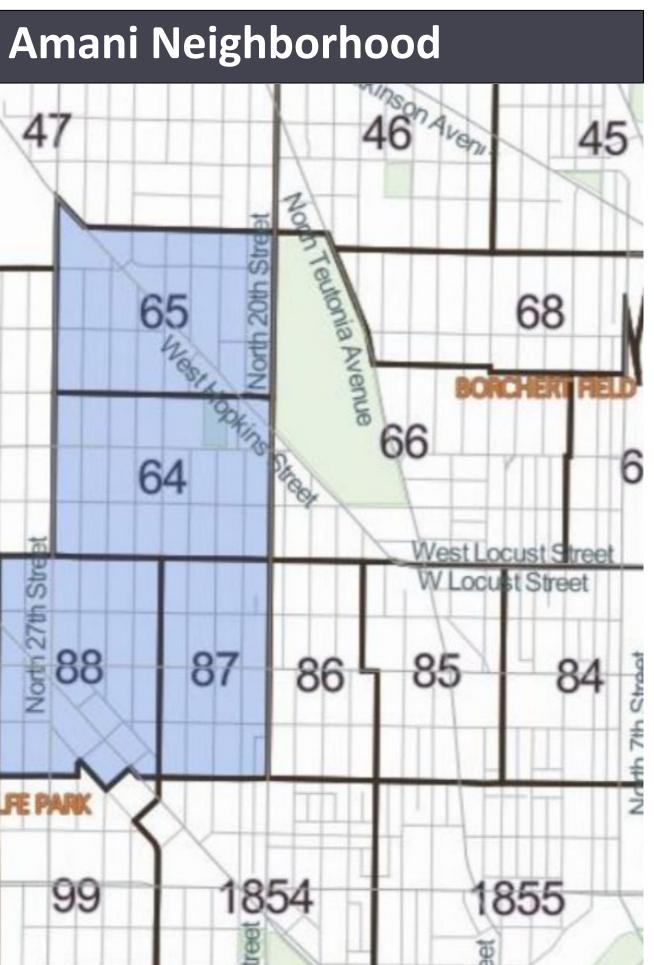

- **Does the data seem right?**
- Based on the what we've learned today
 - what could be done in the short term?
 - what could be done in the long term?

Talk about data and health in the

neighborhood that may be related to risks of

Your experience

- **USE ONLY**

★ THESE WORKSHEETS ARE FOR YOUR

★ List the first name of 10 people you know who live in the neighborhood **★** Circle an icon for each person you know who has the health condition ★ Put a question mark if you don't know

Pressure

Diabetes

Chronic Asthma

How common are these conditions in Amani?

High Blood Pressure

Diabetes

Chronic Asthma

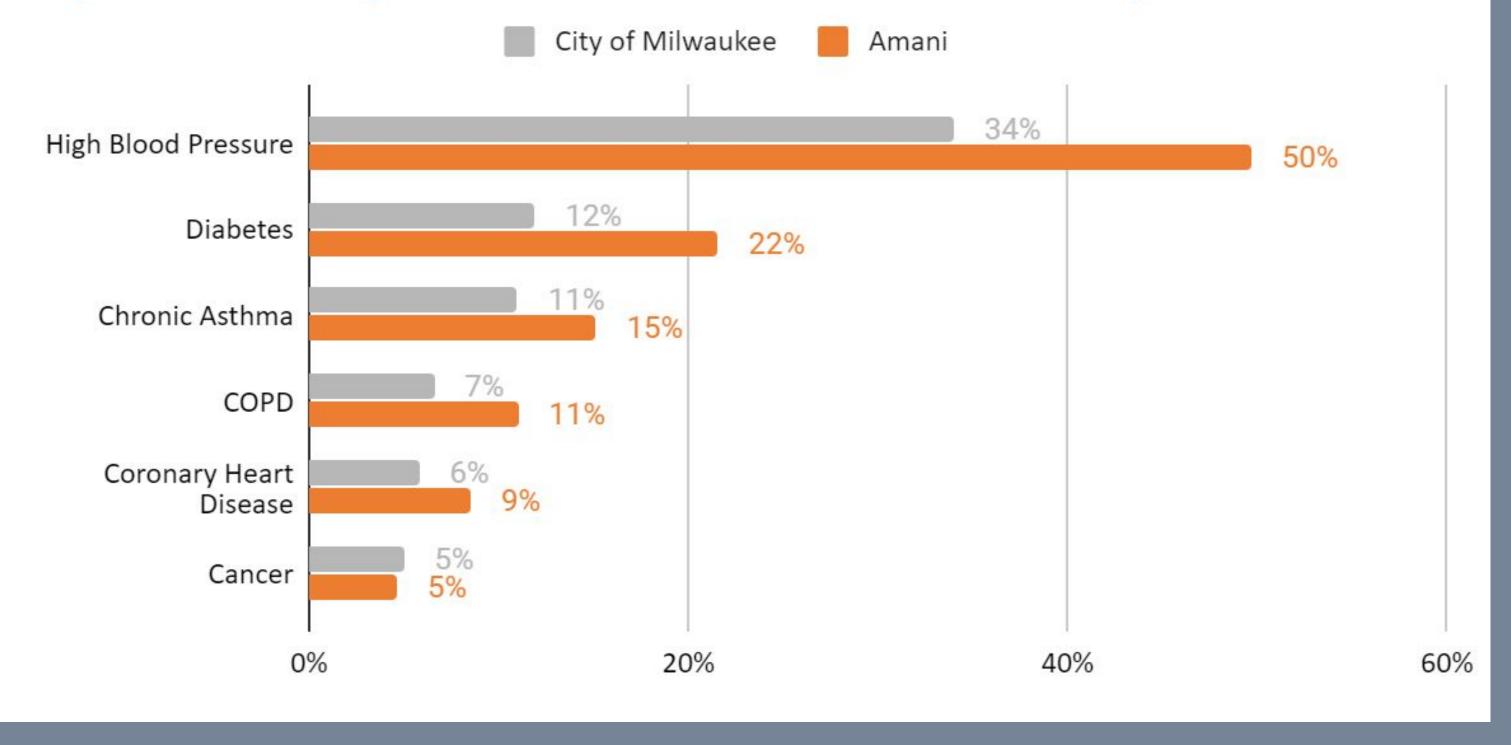

5.0 out of 10 (50%)

2.2 out of 10 (22%)

1.5 out of 10 (15%)

Amani and the City of Milwaukee

High blood pressure, diabetes, and asthma put residents of the Amani neighborhood at greater risk for COVID-19 than the City as a whole.

Mental Health

began.

Before coronavirus Since coronavirus

Source: US Census Household Pulse Survey, September 2020. Data are collected at the state level and represent the national average.

People are experiencing more anxiety and depression since the pandemic

Your advice and solutions

If you could make a recommendation to your would it be?

After a vaccine has been developed and the emergency of the pandemic has passed, what recommendations would you make to improve health conditions in the neighborhood?

neighbors about what might be done in the next 6 months, what
