

NNIP NEIGHBORHOOD DATA INVENTORY SUMMARY RESULTS

FEBRUARY 2024

An Introduction to the NNIP Neighborhood Data Inventory

As local data intermediaries, NNIP partners **assemble, transform and maintain data** and help local government, community organizations, and foundations use this information in to shape strategies and investments so that all neighborhoods are places where people can thrive. The experiences of our partners over the last two decades have affirmed the value of the NNIP model, which emphasizes data holdings that are:

- Neighborhood level
- Multi-topic
- Updated over time

Each year, as part of their commitment to the network, Urban Institute (Urban), as the network coordinator, asks NNIP partners to report out on the **local administrative data** that they maintain, including the sources, time period of coverage, and geographic level of their files.

Urban uses this information for internal planning, to formulate cross-site project ideas, and to understand the national patterns in data availability by domain at the local level. Local partners can use this report to demonstrate the number of organizations that have access to particular data sources when building relationships and negotiating with their own state and local government agencies for data.

We have summarized the NNIP partner reports on their data holdings by data source in the following tables:

- Geographic Level (address/parcel, census tract, etc.)
- Record Type (record level or summary data)
- Most Recent Year of Data
- Number of Years of Data

Please note: Urban does not hold any of the data that local NNIP partners maintain. Many [partners](#) do make their data available in [neighborhood profiles](#) or for download on their websites.
