***

Background on NNIPCamp

Un-conferences are simply participant driven self-organized conferences as opposed to tightly planned and top-down scheduled events. (see Wikipedia entry). They are ad-hoc events driven by the participants and your desire to share and learn through open discussion, demonstration and participation.

"NNIPCamp" will be a series of 9 to 12 concurrent sessions over two days co-created by the meeting participants. The purpose is to bring together people who are passionate about a particular topic and allow the creative juices to flow. A few weeks before the meeting we'll create a site to share session ideas. The sessions could be a place to incubate the next NNIP cross-site project; to troubleshoot and discuss something you are struggling with; or to delve deep into a particular issue area.
