

# Strategies for Community Data Groups to Support a 2020 Census Complete Count

2019 Community Indicators Consortium Impact Summit

October 11, 2019

# National Neighborhood Indicators Partnership (NNIP)

# 2020 Census Cross-Site Project

- Encourage local organizations with data, analysis, and technology skills to support Get Out the Count efforts
- Offer examples of using data to improve Complete Count strategies

# 2020 Census Cross-Site Project

## Percentage of respondents participating in different 2020 Census activities

Source: NNIP survey of Partners' 2020 Census activities. n= 31

# Partner Examples

Laura McKieran  
Community Information Now (CI:NOW)  
San Antonio, TX

Donovan Lee-Sin  
The Children's Trust  
Miami, FL

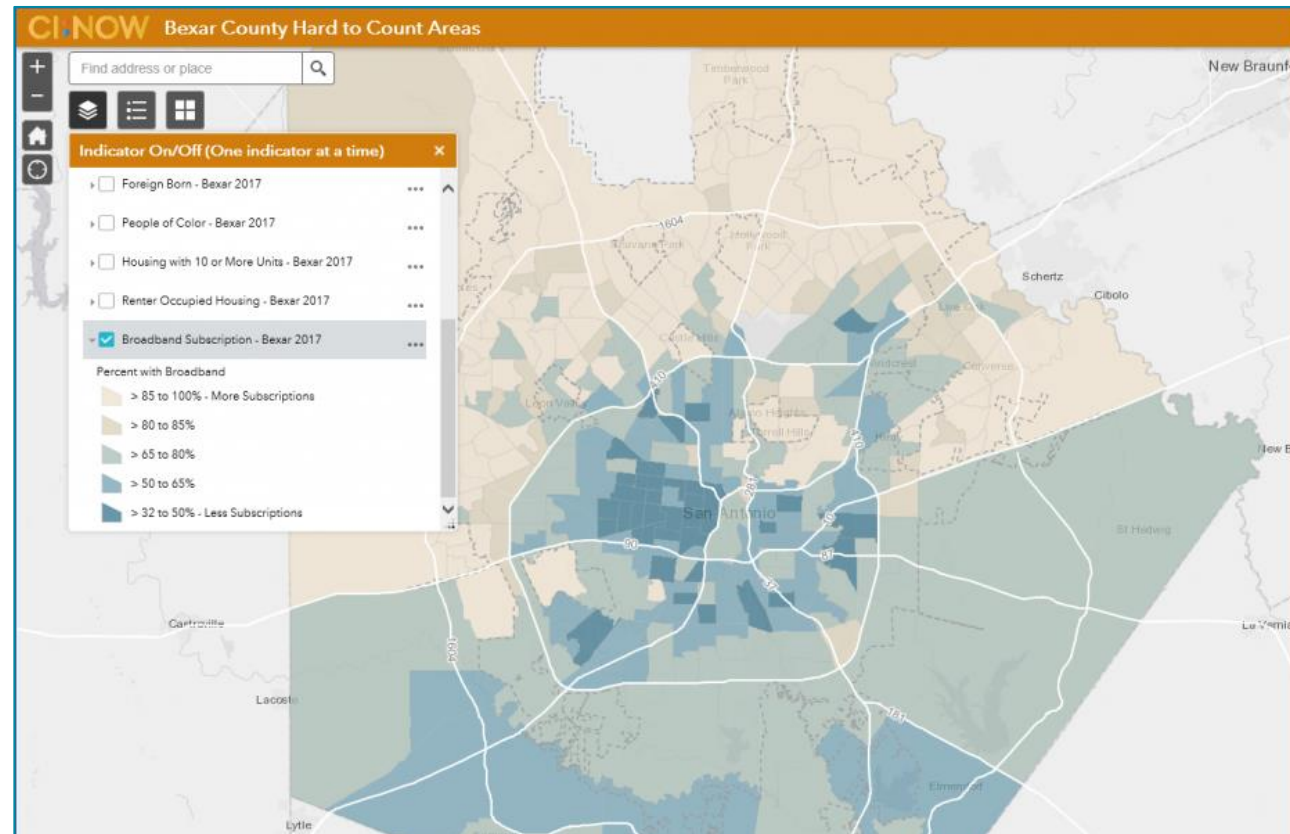

# Additional data to help identify neighborhoods for outreach

## Indicators of **likely undercount**

- Lower voter turnout
- Lower broadband subscription
- Lower digital literacy

Alternatively, indicators of **high density of priority populations** (check list of Census-guided programs)

- Young children
- People who are food-insecure
- People who are uninsured

# Data to help with case-making and outreach

# Data to augment real-time response rates

1. Work with COSA and CCC to develop [local outreach performance metrics, tracking systems, and mechanisms for mutual accountability](#)
2. Develop and train on [online performance management data tool to finely target neighborhood outreach in real time](#), including:
  - automated alerts for low response rates
  - identification of high-priority block groups by cross-referencing hard-to-count population distributions within a census tract
  - data/information to assist with geographic placement of messaging, e.g., relevant VIA bus route(s), commercial corridors, senior centers
  - training and TA to maximize effective use of the tool
3. Provide additional [data analysis, maps, and other visualizations](#) to assist in finely targeting neighborhoods, partners, and outreach vehicles for specific segments of hard-to-count population
4. Assist with data-related communications and messaging
